

SRI B. B. SAYANAK —May I know whether the dependents of the khatedars have been given jobs?

SRI S. M. YAHYA —Some of them are there. But we cannot keep all the statistics. It is not easy to keep statistics to know whether a person is from Belgaum or any other taluk or whether he is the son of a khatedar. It is not possible to keep statistics like that. In fact our department have told them to have some statistics in this matter.

Junior Colleges in Mandya District.

765. SMT DAMAYANTHI BORE GOWDA (Srirangapatna).—Will the Minister for Education be pleased to state,

(a) the number of Junior Colleges in Mandya District and the strength of each colleges.

(b) the steps taken to repair or provide buildings to the colleges

(c) will Government intends to close the colleges whose strength is less than eighty in each colleges?

SRI M. MALLIKARJUNASWAMY. (Minister for Education).—

(a) Nine. A statement indicating the strength of students in each of the Junior Colleges is appended.

(b) Action has been initiated to get the plans and estimates for construction of additional accommodation to a Junior College at Beasagaralli and for construction of the 2nd phase of the Higher Secondary School building at Nagamangala.

The Chief Engineer has been requested to take steps for effecting repairs and maintenance of Higher School Building at Mandya, Maddur and Srirangapatna. These schools which were formerly managed by the Municipalities have been taken over by the Government.

(c) The criterion adopted by Government is not a minimum strength of *eighty* in a Junior College. The guide-lines adopted for continuance of a Junior college are given below;—

(a) There should be a minimum strength of 40 students in the first year.

(b) For arts and commerce put together in the first year there should be minimum of forty students. If not, the Arts and Commerce section of that college should be closed down. The existing students should be accommodated in the neighbouring Junior Colleges.

(c) For Science combinations taken together there should be in the first year a minimum strength of forty students. If not, the Science Section of that Junior College should be closed. The existing students should be accommodated in the neighbouring Junior Colleges.

(d) If in a Taluk on applying the above formula, all the Junior Colleges existing in the Taluk will have to be closed down, then a Junior College in the Taluk Headquarters shall be continued notwithstanding the fact that its strength does not conform to the requirements as set out in the above formula.

(e) In the one Junior College that is retained in a Taluk if Arts and Science Sections both existed, both should be continued even though in neither section, the minimum strength of 40 students is present.

It was decided in 1975 that such of the Junior Colleges who do not satisfy the above requirements may be closed. But this decision was held in abeyance for 1975-76.

The question whether those Junior College which do not satisfy these requirements should be closed down is under consideration.

STATEMENT

Showing the number of Junior Colleges and the strength of students of Junior Colleges in Mandya District during 1975-76

Sl. No.	Name of the Institution	Strength of students in P. U. C during 1975-76.
